Career Objective

Software Testing Engineer with 1.5 years of hands-on experience in manual, API testing, and performance testing. Adept at designing and executing test cases, identifying bugs, and ensuring software quality. ISTQB certified, demonstrating a strong foundation in testing principles and methodologies. Passionate about delivering reliable software products, with a focus on optimizing user experience and enhancing application performance. Proficient in working within Agile environments and collaborating with cross-functional teams to meet project deadlines. I am ready to bring a detail-oriented mindset, and have good experience in ERP, E-commerce, and CRM domains.

Education

Bachelor's,	2018 – 2022
<i>Computers and Informatics, Computer Science department, Obour institutes</i>	Obour, Egypt

Professional Experience

QC Engineer, Germania Tek	04-2023 – present
Responsibilities:	cairo, Egypt
<ul style="list-style-type: none">• Design test cases to check the functionalities of web projects and report bugs.• Perform Functional Testing, Regression Testing and smoke Testing.• Perform API Testing Using Postman.• Reported daily status for test cases execution and raised bugs• Executed test cases and reviewed the results to get business approval.• Perform Smoke Testing before any deployment.• Communicate with developers regarding software defects	

Projects

- **(Pazar-App) - E-commerce Platform.**
- **(Akmashaty) - E-commerce Platform.**
- **(El-Doctor) - Healthcare Platform.**
- **(Azan) - Islamic Platform**
- **(Pripo) - Task Management Application**
- **(yalloroud) - Food Delivery Platform / Restaurant Ordering System**
- **(اعمار سوريا) - Donation App**
- **(coockeis) - Restaurant Management System website**

My role is as follows:-

- Review Requirements.
- Create & Execute Test Cases.
- Find Bugs & write bug reports.
- Compare the Actual Result of test case execution to the Expected Result.
- Follow Up with the Development Team.

- Functional test by executing testing types like Smoke, Regression, Integration, and User Acceptance Testing

Skills

Technical Skills:-

- Good Understanding of software testing techniques.
- Read and understand test basis such as business requirements.
- Write test cases based on test basis analysis.
- Find defects in the static testing phase.
- Very Good knowledge of the Software Development Life Cycle (SDLC).
- Good Knowledge of white box testing and Black box testing
- Functional testing on every component of an application.
- Very Good in Test Execution Process, Defect Life Cycle, and Test Plan.
- Have a good knowledge in Agile mindset and Methodologies.
- Good Knowledge of API testing using Postman.
- Good knowledge of programming languages (C++ and Python).
- Good Knowledge of Data analysis.
- Good Knowledge of Data Base fundamentals.
- Performance testing
- Very Good at using Microsoft Office (word – excel – PowerPoint – etc).

• Personal Skills:

- Self-motivated and fast learner.
- Ambitious and self-motivated person.
- Communication and presentation skills.
- Adapt quickly to changing circumstances.
- Ability to work in a group or individually according to job requirements.

Courses

Software Testing Workshops (Youtube)

- Manual software testing fundamentals
- Understand API testing fundamentals and hands-on experience with Postman
- black-box testing techniques like equivalence partitioning and boundary value analysis

The Complete 2024 Software Testing Bootcamp (Udemy)

- Manual software testing fundamentals
- Understand API testing fundamentals and hands-on experience with Postman
- black-box testing techniques like equivalence partitioning and boundary value analysis

Practical Manual Software Testing - From Fundamentals (Udemy)

- SDLC VS. STLC
- How to write low level test cases.
- Understanding and analyzing software requirements specifications (SRS).
- Prepare detailed bug reports

Languages

- Arabic
- English
