EXPERIENCE

Resident Dentist

KDC Dental Academy

- **Comprehensive Diagnosis and Treatment:** Conducted thorough examinations to diagnose a wide range of dental issues, including cavities, gum disease, and oral infections. Developed and implemented effective treatment plans tailored to each patient's needs.
- **Anesthesia Administration:** Skillfully administered local anesthesia to ensure patient comfort during various dental procedures, including extractions, fillings, and root canals.
- **Patient Education:** Provided detailed education on oral hygiene practices, demonstrating advanced techniques such as proper brushing and flossing methods. Emphasized the importance of preventive care to maintain long-term dental health.
- **Communication and Rapport Building:** Developed strong interpersonal skills, fostering trust and rapport with patients. Ensured clear communication regarding treatment plans and procedures, enhancing patient satisfaction.
- **Restorative and Cosmetic Dentistry:** Restored dental function and aesthetics through a variety of treatments, including crowns, bridges, veneers, and teeth whitening. Focused on achieving optimal results while maintaining patient comfort.
- **Routine Procedures:** Performed routine dental cleanings, fillings, and extractions with meticulous attention to detail, ensuring patient safety and comfort throughout.

- **Advanced Imaging Techniques:** Utilized state-of-the-art dental imaging technologies, such as digital X-rays and intraoral cameras, to accurately assess dental conditions and plan precise treatments.
- **Community Outreach:** Organized and conducted free dental camps, providing valuable education on oral hygiene to underserved communities. Promoted awareness of dental health and preventive care.

General Dentist

Dr. Sushma's Dental Clinic

- **Patient Relationship Management:** Built strong communication skills and developed rapport with patients, ensuring a welcoming and supportive environment. Addressed patient concerns and provided clear explanations of treatment options.
- **Routine Dental Checkups:** Conducted comprehensive dental checkups, including oral examinations, cleanings, and preventive care. Identified potential issues early and provided timely interventions.
- **Diagnosis and Treatment Planning:** Diagnosed a variety of dental problems, such as cavities, gum disease, and oral infections. Formulated effective treatment plans to address these issues and improve oral health.

General Dentist

Dr. Jobu's Dental Clinic

- **Enhanced Communication Skills:** Strengthened communication abilities, establishing strong relationships with patients. Ensured patients felt comfortable and informed throughout their treatment journey.
- **Oral Health Assessment:** Conducted thorough assessments of patients' oral hygiene, identifying areas for improvement and providing personalized treatment plans.
- **Painless Treatments:** Delivered painless dental treatments, including fillings, extractions, and root canals, using advanced techniques to minimize discomfort.
- **Assistance in Complex Procedures:** Assisted specialist dentists in major cases, such as impactions and dental implants. Provided support during complex procedures, ensuring patient safety and successful outcomes.
- **Patient Education:** Educated patients on proper oral hygiene practices, demonstrating effective brushing and flossing methods. Encouraged preventive care to maintain optimal oral health.
